

USER MANUAL

USB VGA KVM Switch

10.12.0001

The 10.12.0001 switch allows you to use two different computers via a single monitor, mouse, keyboard and speakers. Valid for ultrawide monitors and compatible with Windows, Mac and Linux. Computers from different operating systems can be combined into a single switch.

Package Contents:

- 1 x Two-port KVM switch.
- 2 x KVM PCS cable.
- 1 x User Manual.

Functions:

- Using the two computers with a single monitor, keyboard, mouse and speakers.
- Equipment selection button and LED indicator of the computer that is in use.
- Changing the computer using key combination.
- Supports video resolution up to 2048x1536.
- Compatible with DVR (Digital Video Recorder) and online games.
- *Plug & Play.*
- Supports stereo audio.
- It has an additional USB port to connect the peripheral or device of your choice (external hard drive, webcam, graphics tablet, pendrive, etc).

Installation and use:

1. Connect the two computers to the switch using the PCS KVM cables.
2. Connect the monitor (VGA port), keyboard, mouse (USB ports), speakers and microphone (3.5mm Jack ports) to the switch.
3. Start both computers and after booting both, you can change between them using the switch button or key combination.

Keyboard combinations:

Press the keys one after the other to perform the command.

Automatic scanning

* To exit auto-scan mode press the *Esc* key.

* On Apple operating systems, the *Scroll Lock* key corresponds to the command: Control + F14.

* If you do not have the commands on the keyboard, open the on-screen keyboard.

Precautions:

- Carefully connect the cables to the equipment and switch.
- Place in dry environments without extreme weather conditions.
- Keep away from liquids and heat sources.
- Do not attempt to open the switch or insert external objects into the switch.

Warranty:

Nanocable offers a 24 month warranty from the time of purchase, so it is necessary to have the ticket or invoice where the date appears. The distributor or seller where you purchased this product will respond to your claim and offer your technical service while the warranty is in effect. The switch must show the serial number without having been altered or deleted, if it is not intelligible, the warranty will not be applied.
