

CABLE CONVERTER DISPLAYPORT MALE IN ONE END AND DVI MALE IN THE OTHER

The converter cables facilitate connectivity between different multimedia devices with different connections. This way you will avoid using adapters, converters or additional cables, you will have it all in one product. **They are perfect for domestic and professional environments.**

The DisplayPort to DVI converter cable **supports video resolutions up to 1920x1080 @ 60Hz**. Compatible DisplayPort 1.2a.

24K gold shielded connectors to avoid any signal loss and improve image/sound quality.

The converter cable is a component **capable of transforming the technology from one device to another type of signal**. It is ideal for professional and domestic use.
