

HDMI V1.4 CCS CABLE, A/M-A/M

The image travels **without noise** or **distractions**. A cable designed so that every detail arrives intact, with **fluidity** and **depth**, from the source to the screen, respecting the original intention of each scene and each sound..

Accurate colours, sharp contours and a **stable signal** even in demanding scenes. The visual experience is preserved without loss or interference.

The audio flows with the same clarity as the image, creating an **immersive** and **synchronised** experience. Ideal for home cinema, video games or high-definition content.

Designed to minimise interference and ensure consistent transmission. Its materials and finishes reinforce the connection, even in demanding or prolonged installations.

Specifications:

- High-quality gold-plated connectors. Multiple shielding for maximum reduction of potential interference.
- High-quality copper-clad steel (CCS) conductors.
- High-speed, bidirectional network with speeds up to 100 Mbps.
- Supports audio return channel functionality.
- Compatible with 4K x 2K (3840x2160 24Hz/25Hz/30Hz; 4096x2160 24Hz) and 1080p video resolutions.
- Enables 3D over HDMI on compatible devices.
- Additional colour spaces (sYCC601, RGB & YCC601).
- Refresh rates up to 120Hz frame.
- Supports DOLBY True-HD and DTS-HD.
- Supports up to 8 channels of uncompressed digital audio at 192KHz/24bits.
- Compatible with high-bandwidth digital content protection (HDCP).
