

USB-C TO HDMI/VGA CONVERTER
10.16.4303

EAN: 8433281013278

Our converter is here to break down any barriers you may have. Now you can connect your new USB-C device to two displays at the same time. You'll be able to play the same content on one display with HDMI and another with VGA - no one will be left behind!

Connect our converter to your computer's USB-C port on your computer and play the content you want on the connected displays.

All outputs of our converter work at the same time!

View what you want in two different screens.

You don't need any additional software. Once you have everything connected it will work without having to do anything else.
